Nostalgic Quilting

EMBROIDERY CLUB #83
Designed by Marie Duncan

Do you yearn for a large front porch, wicker furniture, mellow, vintage fabrics and nothing better to do on a summer afternoon than drink cold lemonade? Bring that feeling inside year around, when you make this romantic, vintage inspired quilt in a throw size, as ours is, or in any size you like. This is a fail proof quilt that even a beginning quilter can make easily. No need to match corners, no need to quilt in straight lines. Start with a “collection” of fabric. You can raid your own stash, or take advantage of the “collections” that the fabric companies put together for you. The color choice is yours, start with a focal fabric. It should have a variety of colors in it. Add a solid, or tone on tone for the embroidered blocks, then an additional four or five fabrics varying from small florals or geometrics, to large prints. A variety of print types is good. Small, large, geometric, stripes, dots etc. The colors should be what tie them together. If vintage isn't your “thing”, go for the bold! It will be equally stunning!
